

COVID-19 vaccine

Protect yourself, get the COVID-19 vaccine.

English transcript

The COVID-19 sickness is serious. It is spreading and it has come to the NT.

COVID can infect every person. You can get it. You can get sick from it. You can die from it.

Getting the COVID-19 needle is the best way to protect our young ones, our elders and those already sick with other illnesses.

The COVID-19 vaccine is safe for all people, including Aboriginal people. You will need to have two needles to make sure you are fully protected.

Help keep the COVID-19 sickness out of our community by getting the vaccine. Talk to the health clinic to get the true story about COVID-19.
