

# Getting the COVID-19 vaccine

## What you should know

YES  
vaccine

There are new vaccines for COVID-19.

16+

Only people over 16 years can have the vaccine.

2x vaccine

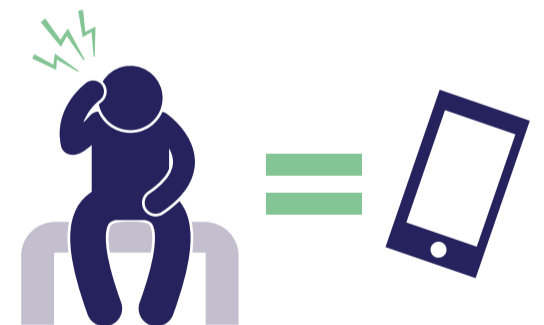

You must have two doses of the same COVID-19 vaccine to ensure the best protection.

Health centre nurses will give you the vaccine.

The vaccine will protect you and your community from COVID-19.

It's important if you or your family feel sick to ring the health centre.

If you need an interpreter when reading this, please ask for a staff member.
